

VTS Upcoming Events Page Review

Approved implementation instructions for Muhammad

Page: <https://seofixesvts.wpenginepowered.com/upcomming-events/>

1. Page Name, Heading, and Introduction

Page name: Upcoming Events

Main heading: Training Calendar & Events

Introductory text:

Find upcoming trainings, workshops, and events designed to help Veterans, Service Members, and Military Spouses build skills, earn certifications, and prepare for successful civilian careers.

Keep these four benefit statements:

- Build New Skills
- Earn Certifications
- Advance Your Career
- Strengthen Your Future

2. Correct Contact Information

Email: customerservice@veteranstransitionssupport.org

Phone: 760-798-0333

Remove all placeholder phone numbers, email addresses, staging links, and temporary contact information.

3. Event Source and Automatic Updates

The Upcoming Events page must pull events automatically from **Eventbrite**.

- New events added in Eventbrite must appear automatically on the website.
- Changes to dates, times, titles, locations, and registration links must update automatically.
- Cancelled or removed events must no longer appear.
- No one should have to manually rebuild the website event listing each time.
- The calendar must be API-ready so approved partners can share or display the same live event information elsewhere.

4. Event Card Content

Each event card should display:

- Event title
- Date
- Start and end time
- Time zone
- Location or Zoom
- Short event description
- Registration status
- Registration button

Registration button: REGISTER NOW

When someone clicks the button, Eventbrite will show whether registration is open, waitlisted, sold out, or closed.

Use **REGISTRATION CLOSED** only when registration is no longer available.

Zoom events: Label clearly as “Live Online Training via Zoom.”

In-person events: Show the city and venue information clearly.

5. Event Filters

Use these filters:

- All Events
- OSHA
- Lean Six Sigma Green Belt
- Lean Six Sigma Yellow Belt
- Career Workshops
- VA Disability
- Online
- In Person

Also include:

- Search by keyword
- Filter by month
- Clear filters button

6. Event Card Layout and Mobile Display

Desktop

- Use a clean grid of event cards.
- Keep dates, titles, and registration buttons easy to scan.
- Show the next upcoming events first.
- Keep spacing and card sizes consistent.

Mobile

- Stack event cards vertically.
- Keep the date, event title, format, and REGISTER NOW button visible without sideways scrolling.
- Make buttons large enough to tap easily.

7. Event Details and Registration Links

- Each event card must link to the correct Eventbrite registration page.
- Clicking REGISTER NOW must open the matching Eventbrite event.
- Dates, times, time zones, and formats must match Eventbrite exactly.
- Do not allow broken or outdated registration links.
- Past events must automatically move off the main upcoming-events view.

- Show upcoming events in chronological order.

8. Past Events

- Upcoming events appear first in chronological order.
- Past events automatically move to a separate archive or are removed from the main page.
- Cancelled events should not remain visible.
- Registration buttons must never point to expired or incorrect Eventbrite pages.

9. Header and Footer

- Use the same approved VTS header and footer as the rest of the redesigned website.
- Use the real VTS logo in the header.
- Use customerservice@veteranstransitionsupport.org and 760-798-0333.
- Remove placeholder links, temporary staging content, and incorrect contact details.

10. Visual Design and Hero Image

- Use the approved VTS dark blue: #254771.
- Use white and light-gray backgrounds for clarity.
- Use VTS red only as a small accent, not as the dominant color.
- Use one strong, professional hero image showing Veterans or Service Members in a training or career-development setting.
- Avoid generic stock photos of flags, salutes, or staged handshakes.
- Keep event cards clean and consistent with the rest of the redesigned VTS website.
- Make the page easy to scan without overcrowding it.

FINAL APPROVAL: This document contains only the page changes and requirements approved during review.
